Part One - Physical DFDs

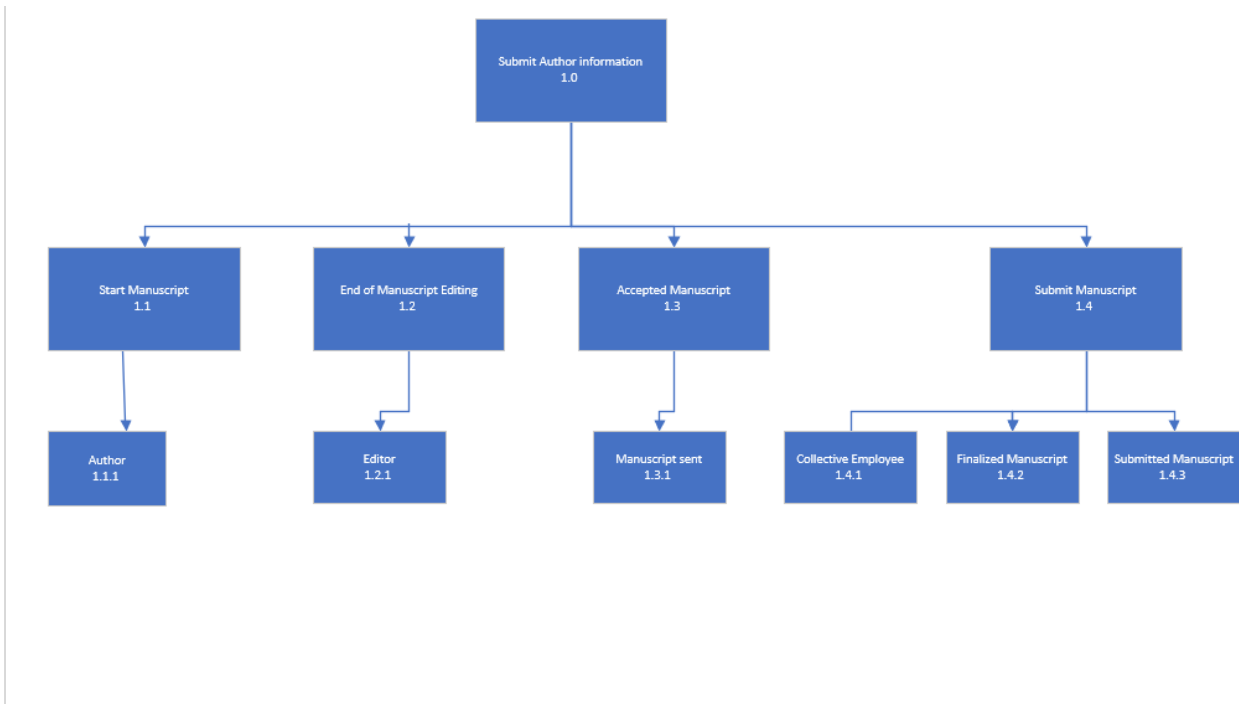

Comment: Your team has done a great job creating physical DFD fragmentations. However, it's still desirable to combine all the DFD fragmentations and create a physical DFD for level 0 logical DFD.

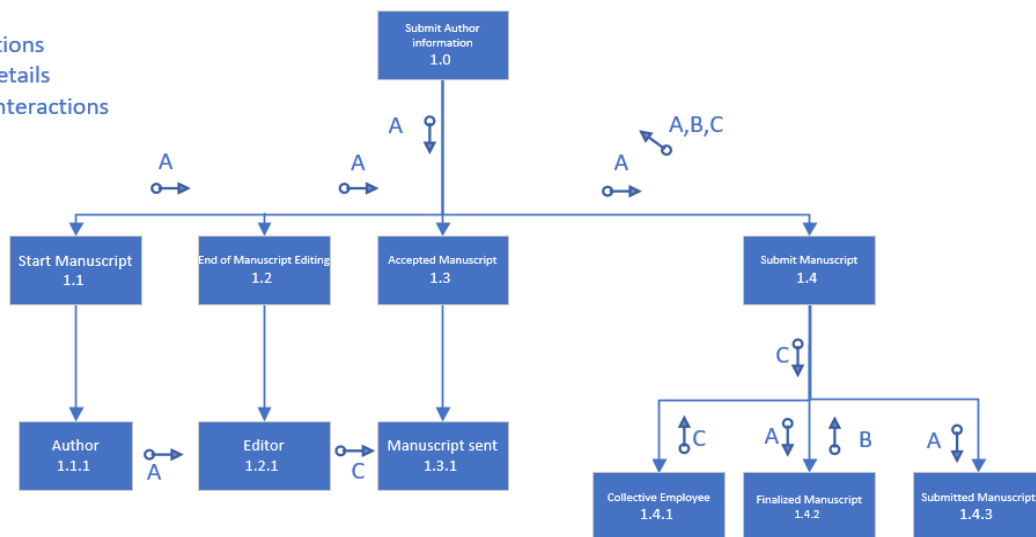

Part Two: Structure charts

Modules and levels

Adding couples

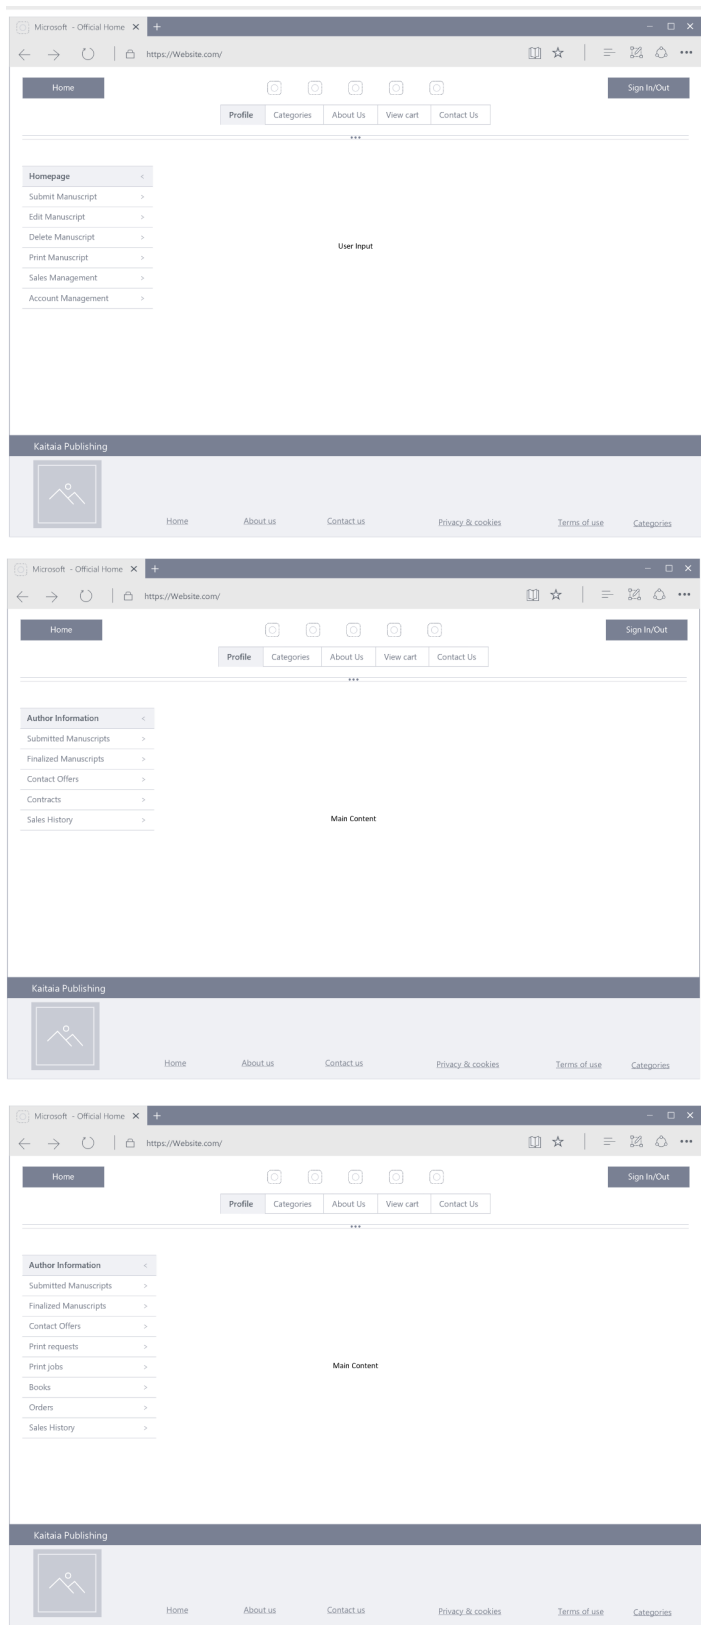

A: Author Interactions
B: Manuscript Details
C: Employee Interactions

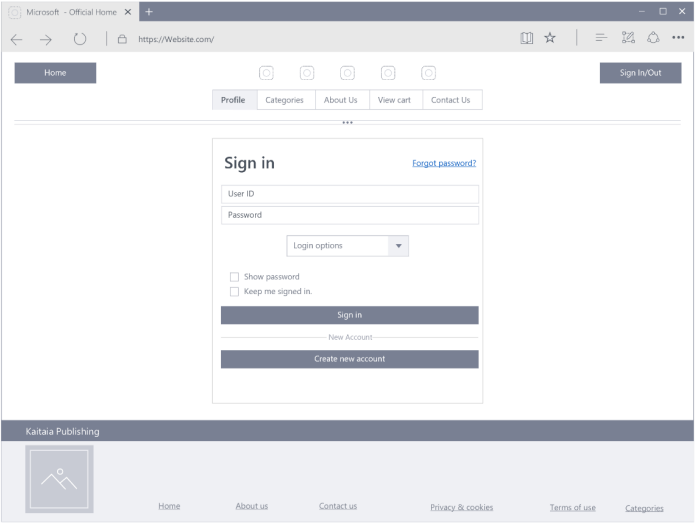

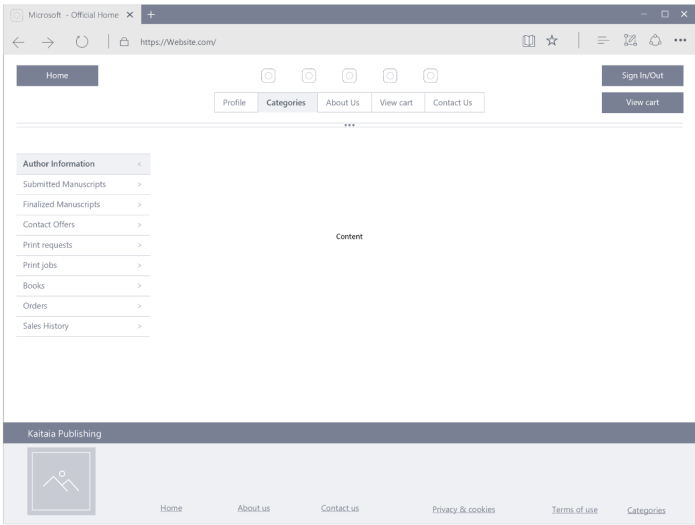

Comment:

1. Your structure chart seems to correspond to the first physical DFD fragment.
2. Each subordinate module (such as 1.1, 1.2, or 1.3) should correspond to a level 1 process decomposed from process 1.0 in level 0 DFD.
3. You had better include the structure charts for other physical DFD fragments.
